REVENUE DEPARTMENT.

CIRCULAR.

No. 10639—46, *dated 4th June* 1913.

It has been brought to the notice of the undersigned that there have been several irregularities in making payments out of permanent advances and imprest amounts held by the Deputy Commissioners and Amildars and in recouping and accounting for them. The following instructions are therefore laid down for the guidance of all officers of the Revenue Department who are entrusted with such advances:—

(1) Attention is invited to Note 2, Article 77, of the Civil Account Code, Volume I, whereby the responsibility for accounting for the amounts drawn out of the permanent advance is fixed on the officer entrusted with it.

(2) An acknowledgment of these advances whenever there is a transfer of charge should be sent to the Comptroller agreeably to Article 78, Civil Account Code, and the instructions contained in para 221 of the Mysore Treasury Manual. if the Officer to be relieved does not satisfactorily account for the advance held by him, the relieving officer incurs serious risk by signing the acknowledgment as a matter of course. He should generally satisfy himself that the whole amount of the advance is made over to him or that there are proper vouchers to enable him to recoup on bills the deficiency, if any.

(3) Officers holding permanent advances should recoup the amounts spent on bills *at least once a month* (*vide* Article 83, Civil Account Code).

(4) Advances sanctioned for a specific purpose should not be utilised for other purposes.

(5) No expenditure requiring the sanction of a higher authority should be ordinarily incurred before obtaining the sanction, but if such expenditure is incurred in emergent circumstances, bills requiring such sanction should not be withheld but submitted to higher authority for sanction or such orders as may be necessary.

(6) The Deputy Commissioners should see that bills submitted to them for sanction or countersignature are checked and passed within a reasonable time and in cases in which cheques have to be issued that they are issued without delay. If the bill requires correction it should be immediately returned therefor. On no account should a bill be retained in the Deputy Commissioner's Office longer than a week.

(7) The register of permanent advance should be maintained in the appended form and imprest cash book in the Municipal Imprest Cash Book form now in use in almost all the taluks. Particulars of amounts recouped, etc., should be noted against the original entry of expenditure.

(8) Care should be taken not to mix up the several advances and imprests. Each should be shown separately and the adjustments pertaining to each correctly noted.

DEPARTMENT OF AGRICULTURE, MYSORE.

Circular No. 8.

BROACH COTTON DISTRIBUTION, 1913.

As an important measure of agricultural improvement in the cotton growing tracts of the Mysore Province, the Department of Agriculture took up during the year 1912-13, the introduction of varieties of cotton which are likely to yield a larger money return to the raiyat than the varieties grown largely at the present time. A survey of the soil and other conditions of this tract made by the Department in the early part of 1912, revealed the fact that, in the ordinary black cotton soils of these areas the locally grown sannahatti or jowarihatti could be replaced by Broach cotton. In order to make a beginning in the introduction of this variety, the cotton growing raiyats of these tracts were canvassed as to their willingness to grow this variety; the advantages were explained in village meetings and to individual raiyats and a Kanarese leaflet was published describing the variety and giving full instructions about the methods of cultivation. About 130 raiyats signified their willingness to grow this crop and 4,666 lbs. of seed were obtained from Navsari through the Bombay Department of Agriculture and distributed.

During the growing season the crop was inspected more than once by the Officers of the Department and it is very gratifying to note that the crop has, on the whole, done exceedingly well. The Department, after securing an estimate of the probable quantity of the cotton that may be coming into the market, placed itself in communication with the principal cotton buying firms in order to obtain for Mysore Broach the best price possible. The highest offer was immediately intimated to all the raiyats through a printed circular; and all cotton growers will be interested to know that Rs. 3-8-0 a maund was paid for good Broach, which is fully twelve annas more per maund than the price of sannahatti.

Under these circumstances I confidently look forward to a large extension of the area under this variety during the coming season. To meet the demand for seed the Department has purchased from the Bombay Department of Agriculture 20,000 lbs. of 1st class Broach cotton seeds. I would request cotton growers particularly to note that the seeds are from lots of cotton which yielded over 34 per cent lint, *i.e.*, nearly 17 seers of lint per maund of cotton. I would also advise that no locally grown Broach seed should be sown, firstly because there are indications that this will lead to a lower ginning percentage; and secondly there is always the risk of such seeds containing mixed with them ordinary jowarhatti seeds. Both these circumstances will tend to bring down the price of the cotton to the level of the ordinary jowarihatti and further to spoil the reputation of Mysore Broach.

The seeds are stocked

1. In the following Taluk Offices:—
   Harihar, Davangere, Jagalur, Molakalmuru, Challakere, Hiriyur, Chitaldrug, Hosdurga, Holalkere, Honnali and Channagiri.
2. In the office of the Agricultural Association, Chitaldrug.
3. In the office of the undersigned at Bangalore, and can be had at the rate of Re. 1 per maund of 25 lbs. at any of these depots.

The following extract from Circular No. 5 of the Department is also published for information of the raiyats:—

"Broach cotton to be sown in black cotton soils in the month of July at the rate of 5 lbs. per acre in rows 2½ feet apart; crop to be thinned out so that plants are one foot apart in the rows; when plants are three feet high they should be topped. In other respects the methods of cultivation are the same as for the local jowari hatti."

Director of Agriculture.

DEPARTMENT OF AGRICULTURE, MYSORE.

Circular No. 8.

BROACH COTTON DISTRIBUTION, 1913.

As an important measure of agricultural improvement in the cotton growing tracts of the Mysore Province, the Department of Agriculture took up during the year 1912-13, the introduction of varieties of cotton which are likely to yield a larger money return to the raiyat than the varieties grown largely at the present time. A survey of the soil and other conditions of this tract made by the Department in the early part of 1912, revealed the fact that, in the ordinary black cotton soils of these areas the locally grown sannahatti or jowarihatti

could be replaced by Broach cotton. In order to make a beginning in the introduction of this variety, the cotton growing raiyats of these tracts were canvassed as to their willingness to grow this variety; the advantages were explained in village meetings and to individual raiyats and a Kanarese leaflet was published describing the variety and giving full instructions about the methods of cultivation. About 130 raiyats signified their willingness to grow this crop and 4,666 lbs. of seed were obtained from Navsari through the Bombay Department of Agriculture and distributed.

During the growing season the crop was inspected more than once by the Officers of the Department and it is very gratifying to note that the crop has, on the whole, done exceedingly well. The Department, after securing an estimate of the probable quantity of the cotton that may be coming into the market, placed itself in communication with the principal cotton buying firms in order to obtain for Mysore Broach the best price possible. The highest offer was immediately intimated to all the raiyats through a printed circular; and all cotton growers will be interested to know that Rs. 3-8-0 a maund was paid for good Broach, which is fully twelve annas more per maund than the price of sannahatti.

Under these circumstances I confidently look forward to a large extension of the area under this variety during the coming season. To meet the demand for seed the Department has purchased from the Bombay Department of Agriculture 20,000 lbs. of 1st class Broach cotton seeds. I would request cotton growers particularly to note that the seeds are from lots of cotton which yielded over 34 per cent lint, *i.e.*, nearly 17 seers of lint per maund of cotton. I would also advise that no locally grown Broach seed should be sown, firstly because there are indications that this will lead to a lower ginning percentage; and secondly there is always the risk of such seeds containing mixed with them ordinary jowarihatti seeds. Both these circumstances will tend to bring down the price of the cotton to the level of the ordinary jowarihatti and further to spoil the reputation of Mysore Broach.

The seeds are stocked—

1. In the following Taluk Offices:—

   Harihar, Davangere, Jagalur, Molakalmuru, Challakere, Hiriyur, Chitaldrug, Hosdurga, Holalkere, Hounali and Channagiri.

2. In the office of the Agricultural Association, Chitaldrug.

3. In the office of the undersigned at Bangalore, and can be had at the rate of Re. 1 per maund of 25 lbs. at any of these depots.

The following extract from Circular No. 5 of the Department is also published for information of the raiyats:—

"Broach cotton to be sown in black cotton soils in the month of July at the rate of 5 lbs. per acre in rows 2½ feet apart; crop to be thinned out so that plants are one foot apart in the rows; when plants are three feet high they should be topped. In other respects the methods of cultivation are the same as for the local jowarihatti."

1. In these rules the expression "Tobacco" shall include unmanufactured as well as manufactured tobacco and the expression "trade packing" shall include packages, cases, boxes, mats, ropes and all articles whatsoever used in packing tobacco.

2. Subject to the provisions hereinafter contained, and with the permission of the Senior Vice-President, a room or rooms in the Bonded Warehouse may be allotted, free of rent, to any wholesale dealer in tobacco.

3. Every wholesale dealer to whom a room has been allotted shall maintain a lock on the door, the key of which shall be in his possession, in addition to the lock placed thereon by the Octroi Officer.

4. Every wholesale dealer shall put up a sign-board over the room allotted to him with his name legibly painted thereon in English and Kanarese.

5. Every wholesale dealer depositing tobacco in the warehouse shall, at the time of deposit, weigh and keep it separate from every other consignment of tobacco previously deposited by him, if any, and shall account for every consignment separately.

6. All tobacco shall be warehoused in the trade packing in which it was received at the warehouse, provided—

(1) that the President or any officer of the Municipality of or above the grade of the Octroi Inspector may at any time direct that any packages containing tobacco lodged in the warehouse shall be opened, weighed or otherwise examined and after such examination cause it to be sealed or marked in such manner as such President or officer may deem fit.

(2) that any wholesale dealer may sort, separate pack and repack his tobacco as shall be necessary for the preservation, sale or disposal thereof, or may take such part of it for sample or for local consumption as may be allowed by the Octroi Inspector on payment of the duty, provided the package in each case is repacked in its original packing or in such other way as may be specially approved by the Octroi Inspector.

10. At each removal of tobacco from the warehouse all godown rents due shall be recovered along with the duty payable. Refusal to pay the same will render the tobacco liable to be dealt with under Bye-law 20.

3. Every wholesale dealer to whom a room has been allotted shall maintain a lock on the door, the key of which shall be in his possession, in addition to the lock placed thereon by the Octroi Officer.

4. Every wholesale dealer shall put up a sign-board over the room allotted to him with his name legibly painted thereon in English and Kanarese.

5. Every wholesale dealer depositing tobacco in the warehouse shall, at the time of deposit, weigh and keep it separate from every other consignment of tobacco previously deposited by him, if any, and shall account for every consignment separately.

6. All tobacco shall be warehoused in the trade packing in which it was received at the warehouse, provided—

(1) that the President or any officer of the Municipality of or above the grade of the Octroi Inspector may at any time direct that any packages containing tobacco lodged in the warehouse shall be opened, weighed or otherwise examined and after such examination cause it to be sealed or marked in such manner as such President or officer may deem fit.

(2) that any wholesale dealer may sort, separate pack and repack his tobacco as shall be necessary for the preservation, sale or disposal thereof, or may take such part of it for sample or for local consumption as may be allowed by the Octroi Inspector on payment of the duty, provided the package in each case is repacked in its original packing or in such other way as may be specially approved by the Octroi Inspector.

7. Wholesale dealers shall not be permitted to deposit, or remove for local consumption, less than one maund (24 lbs) of tobacco in a single transaction, and any wholesale dealer whose removals for local consumption in any one month fall below 10 maunds may at the discretion of the Vice-President be required to vacate the room or rooms allotted to him, or in the alternative to pay a godown rent of Rs. 4 per room for the month during which such removals fall short of the minimum prescribed.

8. The weight of the trade packing will be excluded while recording the weight of the tobacco deposited. While issuing from the warehouse unmanufactured tobacco due allowance will be made on account of dryage. No dryage shall be allowed on manufactured tobacco.

9. Where any wholesale dealer makes no removals continuously for six months from the warehouse, his tobacco shall be removed by the Octroi Inspector from the room or rooms allotted by breaking open, if necessary, the lock put on by the wholesale dealer, and shall be dealt with as provided for by Bye-law 20.

10. At each removal of tobacco from the warehouse all godown rents due shall be recovered along with the duty payable. Refusal to pay the same will render the tobacco liable to be dealt with under Bye-law 20.

11. When any tobacco deposited as aforesaid is eventually exported, it shall be removed only after payment of storage fees calculated as under Bye-law 17 from the date of deposit or from the date of the last removal of the tobacco from the warehouse.

MISCELLANEOUS.

DEPARTMENT OF AGRICULTURE, MYSORE.

Circular No. 8.

BROACH COTTON DISTRIBUTION, 1913.

As an important measure of agricultural improvement in the cotton growing tracts of the Mysore Province, the Department of Agriculture took up during the year 1912-13, the introduction of varieties of cotton which are likely to yield a larger money return to the raiyat than the varieties grown largely at the present time. A survey of the soil and other conditions of this tract made by the Department in the early part of 1912, revealed the fact that, in the ordinary black cotton soils of these areas the locally grown sannahatti or jowarihatti could be replaced by Broach cotton. In order to make a beginning in the introduction of this variety, the cotton growing raiyats of these tracts were canvassed as to their willingness to grow this variety; the advantages were explained in village meetings and to individual raiyats and a Kanarese leaflet was published describing the variety and giving full instructions about the methods of cultivation. About 130 raiyats signified their willingness to grow this crop and 4,666 lbs. of seed were obtained from Navsari through the Bombay Department of Agriculture and distributed.

During the growing season the crop was inspected more than once by the Officers of the Department and it is very gratifying to note that the crop has, on the whole, done exceedingly well. The Department, after securing an estimate of the probable quantity of the cotton that may be coming into the market, placed itself in communication with the principal cotton buying firms in order to obtain for Mysore Broach the best price possible. The

highest offer was immediately intimated to all the raiyats through a printed circular; and all cotton growers will be interested to know that Rs. 3-8-0 a maund was paid for good Broach, which is fully twelve annas more per maund than the price of sannahatti.

Under these circumstances I confidently look forward to a large extension of the area under this variety during the coming season. To meet the demand for seed the department has purchased from the Bombay Department of Agriculture 20,000 lbs. of 1st class Broach cotton seeds. I would request cotton growers particularly to note that the seeds are from lots of cotton which yielded over 34 per cent lint, *i.e.*, nearly 17 seers of lint per maund of cotton. I would also advise that no locally grown Broach seed should be sown, firstly because there are indications that this will lead to a lower ginning percentage; and secondly there is always the risk of such seeds containing mixed with them ordinary jowarihatti seeds. Both these circumstances will tend to bring down the price of the cotton to the level of the ordinary jowarihatti and further to spoil the reputation of Mysore Broach.

The seeds are stocked—

1. In the following Taluk Offices:—
   Harihar, Davangere, Jagalur, Molakalmuru, Challakere, Hiriyur, Chitaldrug, Hosdurga, Holalkere, Honnali and Channagiri.
2. In the office of the Agricultural Association, Chitaldrug.
3. In the office of the undersigned at Bangalore, and can be had at the rate of Re. 1 per maund of 25 lbs. at any of these depots.

The following extract from Circular No. 5 of the department is also published for information of the raiyats:—

"Broach cotton to be sown in black cotton soils in the month of July at the rate of 5 lbs. per acre in rows 2½ feet apart; crop to be thinned out so that plants are one foot apart in the rows; when plants are three feet high they should be topped. In other respects the methods of cultivation are the same as for the local jowarihatti."

LESLIE C. COLEMAN, M.A., PH.D.,
Director of Agriculture.
